

MA905B/3

Combination pH electrode for high pressure applications, double junction, with polymer electrolyte solution and BNC connector with 3 meter cable

Rating: Not Rated Yet

Description

Specification	MA905B/3
Measuring range	0 to 13 pH
Temperature range	-10 to 80 °C
Shaft material	PVC
Reference electrolyte	polymer
Reference junction	double PTFE
Reference type	double, Ag/AgCl
Shape of membrane	flat
Max pressure	6 bar
Connector type	3/4" NPT - BNC
Cable length	3 meter
Shaft length	120 mm
Diameter	22 mm
Application	industrial applications
