Description

MC740

Control the EC & Fertilizer dosage in your tank AUTOMATICALLY!

The MC311 EC controller with dosing pump (MP810) provides fully automated EC control of aqueous solutions in hydroponic systems. It has been specifically designed to control the EC in mixing tanks for fertilization. The small and precise flow of the peristaltic pump allows you to maintain ideal EC values in your tank.

After selecting the desired EC setting from 0.8 to 2.8 mS, the controller measures the EC value of the solution and automatically adds Fertilizer.
