Description

CD97 TDS Economical Pocket Tester

Milwaukee's economical testers are easy-to-use and low cost instruments to measure quick and reliable pH, EC or TDS values. Measuring electrical conductivity is the best way of checking the amount of salt or dissolved solids (TDS) in water.

Milwaukee provides you with a range of pocket testers that will allow you to measure from very low to very high conductivity solutions. All EC/TDS testers compensate for the temperature variance automatically.

The **CD97** is a TDS tester specifically designed for water analysis. The calibration procedure is very simple and fast. This tester has automatic temperature compensation, ± 10 ppm accuracy and a range of 0 to 1000 ppm. CD97 is supplied complete with protective cap, calibration screwdriver, batteries and instructions.
